5. In the first 20 years of the 20th century, the number of people in the United States who were 65 years of age or older increased from 1.5 million to 10 million. This increase was due to a combination of factors, including a decline in the death rate, a decline in the birth rate, and a decline in the rate of immigration. The decline in the death rate was due to a number of factors, including improvements in medical care, a decline in the incidence of infectious diseases, and a decline in the rate of smoking. The decline in the birth rate was due to a number of factors, including a decline in the rate of marriage, a decline in the rate of childbearing, and a decline in the rate of immigration. The decline in the rate of immigration was due to a number of factors, including a decline in the number of immigrants, a decline in the rate of naturalization, and a decline in the rate of immigration.
6. A number of factors have contributed to the decline in the birth rate in the United States. One of the most important factors is the decline in the rate of marriage. Another important factor is the decline in the rate of childbearing. A third important factor is the decline in the rate of immigration. The decline in the rate of marriage is due to a number of factors, including a decline in the rate of dating, a decline in the rate of cohabitation, and a decline in the rate of marriage. The decline in the rate of childbearing is due to a number of factors, including a decline in the rate of pregnancy, a decline in the rate of childbirth, and a decline in the rate of childbearing. The decline in the rate of immigration is due to a number of factors, including a decline in the number of immigrants, a decline in the rate of naturalization, and a decline in the rate of immigration.
7. The number of people in the United States who are 65 years of age or older is expected to increase significantly in the coming decades. This increase is due to a number of factors, including a decline in the death rate, a decline in the birth rate, and a decline in the rate of immigration. The decline in the death rate is due to a number of factors, including improvements in medical care, a decline in the incidence of infectious diseases, and a decline in the rate of smoking. The decline in the birth rate is due to a number of factors, including a decline in the rate of marriage, a decline in the rate of childbearing, and a decline in the rate of immigration. The decline in the rate of immigration is due to a number of factors, including a decline in the number of immigrants, a decline in the rate of naturalization, and a decline in the rate of immigration.
